

# Mind Map Prototype

Report Flow-  
Summarise how your report will flow, the steps and approach you will follow

- Start at centre with Define Question
- Use words/phrase for idea
- Each part of report is a main branch
- Points supporting main branch are smaller branches
- Team can work, comment simultaneously
- List evidence based points-example and research
- Insert Hyperlinks from your research for citations later
- Download/print the map in for developing into full report once completed

# Implementation Plan

# CHECKLIST

## Check Comprehension

- Ask questions to confirm understanding/ask to paraphrase etc

Learning Outcomes: Addressing comprehension of assignment questions- Students often do not answer all questions or leave unexplored certain aspects of questions asked. This will prevent omission due to lack of understanding.

## Introduce Concept

- Introduce Mind map concept and how it works
- Take students along in a combined demonstration of the concept using a real life example from their daily life

Learning Outcome: Organised, critical thinking and communication are very important in Business Management. Explaining how the tool helps in achieving that will train the students minds in handling variety of questions in the subject, including and not limited to, comparisons, explanations, critical evaluations etc.

Using a real life example will make it interesting and also emphasise the importance and use of organised communication in every situation

## Review

- Students check if final map/report checks all requirements of the assignment questions.
- Proofread for errors

Learning Outcome: Communicating one's message is a core skill in business management. Making sure the message covers all required aspects and conveys what the student wants to will ensure communication is successful.
