Enter your "Students" response:

students have access to google docs and google slides. Using these technologies will not have any additional costs nor will it require learning new skills. Although google docs and slides are not supported by the college technical support is available online.

---

Enter your "Ease of Use" response

most students have previous experience with using google docs. students will submit their final work in form of aa word or pdf file, which will be kept in the FOL submission folder.

---

Enter your "Cost" response

I will create the documents for them so that they do not need spend time on learning how to create the files. technical support will not be needed.

---

Your Teaching and Pedagogical Considerations response:

google docs will facilitate online team work and google slides will allow students to engage in live interaction during online synchronous sessions.  
these technologies are also widely used in the work environment, therefore it is beneficial for students to learn how to use them in school.

---

Your "Interaction" response:

facilitating interactions with other students as well as the instructor is the main reason for using these technologies.

---

Your "Organisational Issues" response:

yes, the college does provide support for online course development and delivery

---

Your "Networking" response:

google docs and slides can be shared beyond the course

---

Your Security and Privacy response:

links to google privacy policy will be provided to students. students will not need to log into their google accounts to see and contribute to the files
