

The CARD lesson plan is like driving a car. Here are the component skills required to master delivering a CARD lesson plan.

Understand the purpose of a lesson plan (*know how to drive a car to a destination*)

Manage time and lesson delivery (*know how to drive a car in different weather conditions*)

Use Zoom tools to deliver the lesson (*know how to turn on the car*)

Understand the main components of the CARD lesson plan (Context, Activities, Reflection, Documentation) (*know what a map or GPS is and how to use it*)

Managing one's wellness, appearance, and physical needs to focus on the lesson (*keeping the car and driver in healthy conditions, fueled up!*)

Identify expressive outcomes as the foundation of the lesson (*know the destination*)

Identify the context of the lesson to describe to students (*know how to get to the destination from the driver's current location*)

Identify the lesson activity, and prepare activity materials (*know how to use the tools of the car to set direction, speed, acceleration, etc.*)

Identify the reflection questions to ask students (*know how manage speed, traffic flow to get to destination in time*)

Identify the type of documentation, and prepare resource materials (*remember the journey for the next trip*)

Managing or stopping situations if necessary (*knowing defensive driving skills, and checking mirrors for dangerous driving*)

Guiding reflection, but avoid leading it (*avoid getting upset and being an aggressive driver*)

Reviewing documentation to determine learning (*thinking about a shorter or better journey next time*)
