Quadrants and Quadrants – H5P  
Learning activity by Kathryn  
Bovnik in H5P Studio

This is a quick matching activity  
students can use to ensure  
understanding of the location of 4  
quadrants and x and y components.  
I could provide this as an additional  
practice resource for students who  
struggling with this initial

I would use this as one of the assigned  
readings in my course. It is written by  
experts for practitioners, and  
addresses two learning objectives -  
challenging behavior and diversity. I  
would include some reflection  
questions - one about how covid has  
affected the topic, and one asking  
students to reflect on whether it has an  
American bias to it.

I used the Assessing Online Resources  
with CRAAP (H5P) to evaluate a  
resource (<https://www.yourgenome.org/video/what-does-dna-do>) I found on  
Multimedia Educational Resource for  
Learning and Online Teaching (Merlot)  
The information/video fits my target  
audience (undergraduate university  
students). I could also use this as an  
optional resource for introductory
