Circles of Learning

Image Source: http://www.kovair.com/blog/the-life-of-an-agile-developer-made-easier/

Learning and teaching is a lifelong journey for me. The **Circles of Learning** image represents an agile approach to discover, design, develop and test (deliver) small chunks of new or updated topics at a time. After each sprint is complete, a new sprint starts.

As a practitioner in the industry, I learned to achieve success. As a teacher, I want my students to be successful. I hope this will lead me to become a person of influence and a person of significance. Here are two ideas that will help me in my **Circles of Learning** journey.

1. **Growth Mindset**
   - There is always something new to learn in my field.
   - I strive to find better ways to deliver the course.
2. **Agile Approach to Teaching**
   - Plan and deliver in small chunks
   - Highly flexible with changing requirements
   - Rapid prototyping with frequent feedback
