WIIFM Scrum Fundamentals

When teaching the Scrum Fundamentals (e.g., https://www.scrumalliance.org/learn-about-scrum/scrum-elearning-series) in a Systems Analysis and Design course, students need to know the *benefits* of having a mastery of this topic:

- **Capstone Project course**: This course require student teams to develop information systems for a client. Scrum is a popular Agile methodology used for this course. Student teams that have experienced using the Agile methodology are better prepared for the workplace.
- **Career**: Scrum framework is a popular Agile methodology used in the local Kitchener-Waterloo / Ontario software shops. A quick scan from a job board shows over 500 Scrum Master jobs that are available: https://ca.indeed.com/jobs?q=Scrum+Master&l=Ontario. Many companies are looking for software developers who can work well in an Agile environment.
- **Certification**: The Scrum Fundamentals is the necessary first step in the journey to become a certified Scrum Master (https://www.scrumalliance.org/get-certified).
