**TED Talk – Peter Norvig**

This resource is Peter Norvig talking about how he took his Stanford in-class course on artificial intelligence where he taught 175 students to an online course to over 100,000 via an interactive webcast and online tools. This is a very interesting video where he speaks to how and what he learned from flipping his course online. I really enjoyed this talk.

Peter Norvig: The 100,000-student class... In the fall of 2011 Peter Norvig taught a ... ted

### Evaluating eLearning

This is a tool used to evaluate eLearning Tools. It is a fillable guide/rubric to help anyone evaluate the tool in question against different criteria, allows notes and points to be added during the review. Then once the evaluation is complete it will allow you to create and download the review in a pdf file.

### Nine Principles of Learning

My first link is from eCampus Ontario it covers what is learning and the 9 principles. It is a review of the 9 principles outlined by Alexander Schallert. It breaks each principle down providing more information for each of the 9 principles.
