

Lots of steps towards starting when "I just want to get this done to get into post sec"

Pressure to complete a course on time to be accepted into post-sec
Over all pressure to secure a better future

Fear of returning to school after a long time and/or a bad experience in the past

Struggling with how to use blackboard
Content that is presented in ways that weren't available before

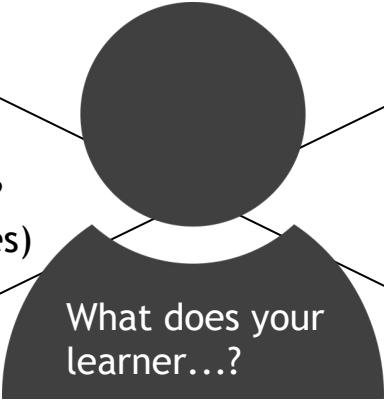

Think and Feel? (preoccupations)

Social group - can be supportive or can be a negative influence

Hear? (influences)

See? (environment)

A lot of material when taken in all at once rather than one lesson at a time

What does your learner...?

Asks a lot of questions and resubmits as much as is possible

Say and Do? (behaviour)

Disengages and doesn't respond to faculty inquiries
Avoids doing the lessons

Rush through material to just submit assignments without reviewing lessons leads to poor marks

Pain Points?

The journal assignments are not often understood

Discussions about how to write an essay seem to be helpful - attending APA formating webinar

Gain Points?

Ability to redo the outline to craft a better essay
