Like driving a car

-Wireless Information Networking Course

For such course, students must master several skills in a day-to-day routine. Like getting used to several new technological tools, playing with them, using the coding, and getting the desired output. They will use several important software's like MultiSIM, LABView, and MS Project. Going to the workstation on time, setting up the workstation, turning on the tools, resetting the tools before starting the labs, doing the hands-on in the labs itself, presenting the desired output to the Professors, completion of the lab on the time, professionalism, and adhering to the Academic Integrity are some common 'Like Driving A Car' everyday skills.
