

#4 – Design Your SoTL Project

Plan for a Scholarship of Teaching and Learning Project

John Colling – Fanshawe College

Ethical Concerns

We must ensure that all of the external 3rd party applications that we utilize in our class adhere to both our assessability and privacy legislation.

Assessability laws are created at 3 levels of our government (Municipal, Provincially, and Federally). We must ensure that all these 3rd party tools adhere to all 3 levels of government regulations.

Any sign on information captured by these 3rd parties must adhere to Canadian Privacy regulations at a minimum. Many 3rd party applications are stored outside of Canada and North America where privacy laws are either lacked or non existent.

All comments, marks, etc. that could be identified to an individual student must be scrubbed to ensure that it is anonymous.
