

## #7 Virtual Field Trips

In our project risk management course, a key learning component is the ability to identify project risks. Project risks can be both positive and negative. One assignment is to identify the risk of building a school in a remote location. By using Google Maps, I can show then Iqaluit, the Capital of Nunavut here in Canada

<https://www.google.ca/maps/about/behind-the-scenes/streetview/treks/canadian-arctic/>

As most students have never ventured into the northern regions of Canada, these pictures and maps provide them with an understanding of the environment they will be working in.
