

## #2 – MORE THAN QUIZZES

I have used other web applications for quizzes. And this was the first time I have been introduced to Quizlet.

To start, I found Quizlet to be much more difficult to use than the other applications I have utilized in my class. I had to search for videos on YouTube to fully understand how to use it. The help is lacking in the tool.

I created a Project Management Flashcard example to help my students understand the terminology for terms as defined by the PMI (Project Management Institute).

[Project Management Terminology \(PMI\)](#)
