Dark Net	Anonymous browser TOR Browser Developed by the US Navel Intelligence Open Source
Encryption	Encrypts your IP Address Routing across several other computer using TOR
Sites	Over 20,000 sites Censorship free world Anonymous Users
Illegal Sites	Not all sites are illegal New Yorker, Whistleblower Illegal Sites Silk Road, Commercial hacking
Website Design	Looks similar to most commercial websites
User Reviews	Vendors have user reviews Good History of positive feedbacks
Drug Haven	Illegal Site With consistent and excellent feed back (95% positive) Fast Email responses Customer is the king
Payment	No credit card Crypto currency High degree of anonymous
Tumbling	the use of combining hundred of different bitcoins into one batch, and then using other bitcoin to pay for the purchase. (Reduces tracing)
Grams	Own search engine for the searching of drug information
Mainstream	Facebook has a site on the dark web Within 3 years expected that every social media and new sites will have a presence on the dark web

The dark web, known as the underbelly of the internet, will within 3 years become more mainstream as social media and new sites embrace the dark web.

Regular web is like an iceberg, just the tip, with more sites on the dark web.
