

Hear from past cohorts that the course is very difficult.

Fear of failing assessments and the course overall.

Challenging and difficult to learn course content as learner does not have a background in the subject.

Problem visualizing and seeing what the instructor is teaching.

### Think and Feel?

Hear?

See?

The assessment questions are challenging.

Problem keeping up with weekly lab exercises.

### Say and Do?

Contact instructor to ask questions or to clarify any confusions about subject matter.

The content is heavy and the new vocabulary is difficult to learn.

### Pain Points?

A lot of information to study - not knowing what areas to focus on.

Time management and priority of courses.

### Gain Points?

Enjoy the smaller break our group sessions with peers to ask questions and go through lab exercises together.

Like the self assessment exercises and practice questions in preparation for tests.
