

Classes in the laboratory are essential as all the activities are graded.

It is hard to balance both work and school.

It is hard to adjust in a new environment and have a community.

There is a 15 minute leeway during at the beginning of the class to mingle with our peers.

Think and Feel?

Do not miss a class as it would be hard to understand the content afterwards.

Hear?

See?

It is important to complete all the activities assigned during the class and compile them in the Portfolio in order to have a smoother end of the semester.

The icons or the screen is too small to follow the tutorial.

Say and Do?

Ask the professor to come help when needed.

There are times that the professor is speaking too fast.

Pain Points?

All the exams are all in the same week before the break/reading week.
