

I am assigned to this project (may not have any interest)

I have taught this before so I have all the content - it should be easy.

Remember to cite sources.

Templates

Think and Feel?

Hear?

See?

The first couple of modules will take longer, after which it will be easier.

Deliverables

What does your learner...?

Say and Do?

Writing content for an asynchronous format is harder than I thought.

It's hard to use the template.

Providing references and citations.

Pain Points?

Getting started

Better understanding of creative commons and getting resources.

Gain Points?

See their static content come to life with interactivity and visuals
